

Camaco Consulting sustainability policy

Following consideration of the importance of environmental sustainability and a commitment to be a benefit to the community, Camaco Consulting is committed to achieve environmental and social sustainability for all our projects and commits to continually improve our environmental and social sustainability performance.

We strive to implement and regularly update an Environmental Management System following guidelines from AS/NZS ISO 14001:2016 (Environmental management systems – requirements with guidance for use). Each project may have a dedicated Environmental Management Plan, depending on complexity.

Camaco Consulting will implement the environmental action plan in accordance with the requirements of our clients, based on the abovementioned family of standards but also complying with the key piece of legislation in Australia, the Environment Protection and Biodiversity Act 1999 (EPBC Act) as we strive to achieve international best practice in all aspects of our business.

On variety of projects we may appoint a resource to act as the Sustainability Coordinator, who has responsibility for ensuring ongoing environmental performance, identification of environmental risks, recording and monitoring of impacts and implementing environmental and social sustainability measures.

Special consideration will be given to employing and empowering local contractors and wherever deemed efficient and environmentally sustainable, products and services will be sourced locally.

We encourage staff to present our commitment to environmental and sustainability and our status to our clients, suppliers and contractors.
